

TRR360 International Conference

22.09-25.09.2025

Kloster Ettal

Monday, 22. September

10:00	Arrival + Coffee
10:50	Opening
11:00	Session 1 - Frustrated magnets: spectroscopy and magnetic fields
11:00	<u>Jochen Wosnitza</u> (Helmholtz-Zentrum Dresden-Rossendorf, Dresden, Germany). <i>Frustrated and low-dimensional magnetic materials in high magnetic fields</i>
11:35	<u>Manila Songvilay</u> (Institut Néel, Grenoble, France). <i>Investigating Kitaev interactions in Co honeycomb antiferromagnets</i>
12:10	<u>Anton Romen</u> (TU Munich, Germany). <i>Spin-phonon coupling and deconfined criticality</i>
12:30	Lunch
14:00	Session 2 - Frustrated magnets: complex orders
14:00	<u>Yuan Li</u> (Institute of Physics, Beijing, China). <i>Investigation of multi-q magnetic orders and transitions in frustrated honeycomb cobalt oxides</i>
14:35	<u>Roser Valentí</u> (University of Frankfurt, Germany). <i>Competing orders in Kagome and triangular networks</i>
15:10	<u>Lichen Wang</u> (MPI for Solid-State Physics, Stuttgart, Germany). <i>Inelastic photon scattering from correlated 4d metals</i>
15:30	Coffee Break + Conference Picture
16:00	Session 3 - Symmetry and topology
16:00	<u>Yoshinori Tokura</u> (RIKEN, Japan). <i>Emergent electric field generation by spin dynamics in topological magnets</i>
16:45	<u>Veronika Sunko</u> (Institute of Science and Technology, Austria). <i>Revealing time reversal symmetry breaking in antiferromagnets</i>
17:20	<u>Yannis Ulrich</u> (MPI for Solid-State Physics, Stuttgart, Germany). <i>Quantum geometry and non-linear Hall effect in topological magnets</i>
17:40	<u>Akmal Hossain</u> (MPI for Solid-State Physics, Stuttgart, Germany). <i>Thermal Hall effect from topological magnons and phonons in the honeycomb magnet $\text{Na}_3\text{Co}_2\text{SbO}_6$</i>
18:00	Dinner
19:30	Poster Session 1

Tuesday, 23. September

8:00	Breakfast
9:00	Session 4 - Topological materials: spectroscopy
9:00	<u>Milan Orlita</u> (LNCMI-CNRS, Grenoble, France). <i>Optical spectroscopy of topological materials in high magnetic fields</i>
9:35	<u>Riccardo Comin</u> (Massachusetts Institute of Technology, USA). <i>ARPES studies of quantum geometry in solids</i>
10:10	<u>Felix Schilberth</u> (University of Augsburg, Germany). <i>Uncovering unconventional phases of kagome materials by optical spectroscopy</i>
10:30	Coffee Break
11:00	Session 5 - Topological materials: frontiers
11:00	<u>M. Zahid Hasan</u> (Princeton University, USA). <i>New Frontiers in Topological Quantum Matter</i>
11:35	<u>Jeroen van den Brink</u> (IFW Dresden, Germany). <i>Topological Weyl altermagnetism in CrSb</i>
12:10	<u>Lin Chen</u> (TU Munich, Germany). <i>Electrical control of magnetism in topological Weyl semimetal WTe₂</i>
12:30	Lunch
14:00	Session 6 - Open quantum systems
14:00	<u>Flore Kunst</u> (University of Nürnberg-Erlangen, Germany). <i>Non-Hermitian topological phenomena</i>
14:35	<u>Rosario Fazio</u> (International Centre for Theoretical Physics, Trieste, Italy). <i>Heat-to-motion conversion in quantum active matter</i>
15:10	<u>Gloria Isbrandt</u> (TU Munich, Germany). <i>Anisotropic spin ice on a breathing pyrochlore lattice</i>
15:30	Coffee Break
16:00	Session 7 - New materials
16:00	<u>Binghai Yan</u> (Penn State University, USA). <i>Topology-boosted quantum geometry in quantum materials</i>
16:45	<u>Brenden Ortiz</u> (Oak Ridge National Lab, USA). Tba
17:20	<u>Bin Shen</u> (University of Augsburg, Germany). <i>Strange metallicity of pressurized kagome ferromagnet</i>
17:40	<u>Parisa Mokhtari</u> (University of Augsburg, Germany and University of Tokyo, Japan). <i>Topological thermal Hall effect in centrosymmetric skyrmion-lattice magnet Gd₂PdSi₃</i>
18:00	Dinner
19:30	Poster Session 2

Wednesday, 24. September

8:00	Breakfast
9:00	Session 8 - Unconventional magnets: neutron scattering
9:00	<u>Allen Scheie</u> (Los Alamos National Lab, USA). <i>Quantum spin liquid physics in 2D triangular $AYbSe_2$ probed with neutron scattering</i>
9:35	<u>Oksana Zaharko</u> (Paul Scherrer Institute, Switzerland). <i>Altermagnet MnF_2, viewed by neutron scattering</i>
10:10	Coffee Break
10:30	Session 9 - Spin dynamics beyond equilibrium
10:30	<u>Axel Hoffmann</u> (University of Illinois, Urbana-Champaign, USA). <i>Hybrid Magnon Modes</i>
11:05	<u>Alexey Kimel</u> (Radboud University, Nijmegen, Netherlands). <i>Anti-intuitive Antiferromagnets: from equilibrium to ultrafast dynamics</i>
11:40	<u>Kirill Vasin</u> (University of Augsburg, Germany). <i>Magnetic circular dichroism of magnon-polarons in the polar altermagnet $Fe_2Mo_3O_8$</i>
12:00	Lunch
13:00	Excursion: Hike
13:30	Excursion: Castle Linderhof
18:30	Dinner
20:00	Career Talk (only for young, female researchers) (<i>Walchensee</i>) Meeting MGK Board + Summer School Committee (<i>Rosner Aula</i>)

Thursday, 25. September

8:00	Breakfast
9:00	Session 10 - Insights from advanced spectroscopies
9:00	<u>Peter Armitage</u> (Johns Hopkins University, Baltimore, USA). <i>2D THz spectroscopy and quantum materials</i>
9:35	<u>Lei Shu</u> (Fudan University, Shanghai, China). <i>Dynamical scaling in a Kitaev honeycomb material $H_3LiIr_2O_6$ revealed by muon spin relaxation</i>
10:10	<u>Denis Mettus</u> (TU Munich, Germany). <i>Non-equilibrium phases in skyrmion lattices</i>
10:30	Coffee Break
11:00	Session 11 - Exotic quantum matter
11:00	<u>Daniele Fausti</u> (University of Nürnberg-Erlangen, Germany). <i>Cavity control of quantum matter phases</i>
11:35	<u>Anna Keselman</u> (Technion University, Haifa, Israel). <i>Photoemission signatures of trions and trion liquids</i>
12:10	<u>Manuel Zahn</u> (University of Augsburg, Germany). <i>Emergent mesoscale textures in topological magnets</i>
12:30	Lunch
14:00	<i>Departure of the invited guests, Start of the TRR360 Retreat Meeting</i>
